Introduction

Abdullah Abdin - At a Glance

Abdullah Abdin Ready Mix Concrete was founded in 1981 in Tabuk region of Saudi Arabia, initially with modest capabilities. Subsequently, the company meticulously executed a well-devised strategy aimed at expanding and diversifying its product offerings within the realm of construction materials. This expansion was driven by the growing urbanization trends witnessed throughout the Kingdom and, specifically, within the city of Tabuk.

From the inception of construction activities in the Tabuk region, Abdullah Abdin Ready Mix Concrete has been the primary influencer in the ready-mix construction sector, playing a pivotal role in advancing the region's infrastructure projects. In response to market demands, the company outfitted its facilities with state-of-the-art equipment and cutting-edge machinery, enabling our factories to achieve a daily production capacity exceeding 15,000 cubic meters.

Our organization has been a significant contributor to numerous prestigious projects within the Tabuk region. Our facilities are known for their utilization of the latest technologies and adherence to the highest industry standards, operated entirely through advanced automated control systems—considered among the most sophisticated globally. Stringent attention is placed on the production process and quality control, employing premium cement materials and precise proportions to ensure adherence to Saudi standards, specifications, and regulations. This approach guarantees the long-term durability and

preservation of product appearance and color, safeguarding against the impacts of climatic factors.

Abdullah Abdin factories are recognized for their prominence in the Middle East of Saudi Arabia as leading establishments specializing in the manufacturing of cement products, including slabs, interlocks, and tiles. The quality of our products is consistently monitored by highly skilled technicians and experienced quality control personnel.

Mission

"Our mission is to provide superior, reliable, and sustainable ready-mix concrete solutions that exceed customer expectations. We are committed to delivering high-quality products on time, every time, while upholding the highest safety and environmental standards.

We aim to foster lasting partnerships with our clients, suppliers, and employees, and contribute to the overall progress and prosperity of Saudi Arabia's construction sector and the Middle East."

Vision

"To be the leading and most trusted ready-mix concrete company in Saudi Arabia, setting the standard for excellence in quality, sustainability, and innovation, while contributing to the growth and development of the Kingdom's construction industry."

Values

Integrity

We operate with the highest ethical standards, honesty, and transparency in all our interactions.

Innovation

We continuously seek innovative solutions to improve efficiency, safety, and sustainability in our operations.

Customer-Centric

We listen to our customers and tailor our solutions to meet their unique needs, striving for their success.

People-Oriented

Our employees are our most valuable assets, and we foster their growth, development, and well-being.

Quality

We are dedicated to delivering concrete products and services of the highest quality, adhering to industry best practices.

Safety

We prioritize the safety of our employees, clients, and partners by maintaining a culture of safety excellence.

Environmental Stewardship

We are committed to minimizing our environmental impact, promoting sustainable practices, and preserving the natural resources of Saudi Arabia.

Community Involvement

We actively engage in community initiatives to make a positive impact on the local communities we serve.

At Abdullah Abdin Ready Mix Concrete,
our commitment to excellence extends across three vital pillars:

Quality, Safety, and Sustainability

Quality

Our unwavering dedication to quality is the cornerstone of our operations. We take pride in adhering to the highest industry standards, meticulously controlling the production process, and using premium materials. This commitment ensures that our ready-mix concrete and cement products meet and exceed the strictest quality criteria. The result is long-lasting, reliable, and consistently high-performing materials that are trusted in a wide range of construction projects.

Safety

The well-being of our workforce and the safety of our operations are paramount. We prioritize creating a secure and nurturing environment that not only protects our employees but also fosters a culture of safety throughout our organization. Our commitment to safety extends to our products, which are designed to meet the most stringent safety standards, providing peace of mind to builders and end-users alike.

Sustainability

Sustainability is a core principle that drives our operations and innovation. We are dedicated to minimizing our environmental impact through responsible sourcing of raw materials, optimizing energy efficiency, and reducing waste in our production processes. Our commitment to sustainability ensures that we not only meet the current needs of our customers but also preserve resources and the environment for future generations. By adopting green technologies and adhering to stringent environmental standards, we strive to build a better, more sustainable future.

Company Overview

**Building
Excellence,
Building
Futures**

Message From the CEO

Dear Valued Partners, Clients, and Stakeholders,

I am delighted to extend my warmest greetings to you on behalf of Abdullah Abdin Company. As the CEO, it is my privilege to share with you our commitment to excellence, innovation, and sustainable growth.

Abdullah Abdin Company has emerged as a leading force in the construction industry in Saudi Arabia, driven by our unwavering dedication to delivering high-quality ready-mix concrete solutions. Over the years, we have played a pivotal role in shaping the infrastructure landscape of the Kingdom, contributing to its development and progress.

Our success is rooted in a culture of continuous improvement, where we constantly strive to raise the bar in terms of product quality, customer service, and environmental responsibility. We take pride in our state-of-the-art facilities, cutting-edge technology, and a highly skilled workforce that enables us to meet and exceed the expectations of our clients.

In a dynamic industry like ours, adaptability and foresight are crucial. Abdullah Abdin Company remains committed to staying ahead of the curve by embracing innovation. Our goal is not only to meet current industry standards but to set new benchmarks for excellence.

We understand that sustainable development is not just a business imperative but a moral responsibility. As a responsible corporate

citizen, we actively pursue eco-friendly practices, prioritize safety at every level, and engage in community initiatives that make a positive impact. Our commitment to corporate social responsibility is a testament to our belief in the holistic development of the regions we serve.

Our journey is marked by partnerships and collaborations that have been instrumental in our growth. We extend our sincere gratitude to our clients, suppliers, employees, and all stakeholders who have been an integral part of our success story. Your trust and support inspire us to reach greater heights.

As we move forward, Abdullah Abdin Company remains dedicated to excellence, integrity, and innovation. We invite you to join us on this exciting journey as we continue to build a sustainable and prosperous future for Saudi Arabia and beyond.

Thank you for your continued trust and partnership.

Sincerely,

Tarek Abdullah Abdin

Why choose Abdullah Abdin Ready Mix Concrete?

When it comes to your construction and building needs, choosing Abdullah Abdin Ready Mix Concrete is a decision that embodies a commitment to excellence. Here are some compelling reasons to opt for our services:

1 Unparalleled Quality

Abdullah Abdin Ready Mix Concrete is synonymous with uncompromising quality. Our materials are crafted using the finest cement, rigorous quality control, and adherence to Saudi standards and specifications. This unwavering commitment to quality ensures that our ready-mix concrete and cement products are reliable, long-lasting, and consistently high-performing.

2 Safety at the Forefront

Abdullah Abdin Ready Mix Concrete is synonymous with uncompromising quality. Our materials are crafted using the finest cement, rigorous quality control, and adherence to Saudi standards and specifications. This unwavering commitment to quality ensures that our ready-mix concrete and cement products are reliable, long-lasting, and consistently high-performing.

3 Sustainability

We believe in being stewards of the environment. Our state-of-the-art facilities are equipped with eco-friendly technology to minimize our carbon footprint. The materials we produce are designed with sustainability in mind, aligning with green building practices and responsible resource management. By choosing Abdullah Abdin, you're making an environmentally responsible choice.

4 Industry Leadership

With a history dating back to 1981, Abdullah Abdin Ready Mix Concrete has played a pivotal role in the construction industry. As leaders in the ready-mix concrete and cement product sectors, we bring a wealth of experience, expertise, and innovation to your projects.

5 Cutting-Edge Technology

Our factories are equipped with the latest technologies and automation systems that are considered among the most advanced globally. This investment in technology ensures efficiency, precision, and consistency in our products, resulting in superior performance.

6 Customer-Centric Approach

At Abdullah Abdin, we value our customers and their unique needs. We provide tailored solutions, expert guidance, and dependable support, ensuring your project's success.

7 Proven Track Record

Our long list of prestigious projects in the Tabuk region and the Kingdom of Saudi Arabia is a testament to our reliability and commitment to excellence. When you choose us, you're aligning with a trusted partner known for delivering exceptional results.

In summary, choosing Abdullah Abdin Ready Mix Concrete means opting for quality, safety, sustainability, innovation, and a commitment to excellence. Whether you're involved in a small-scale project or a major construction endeavor, we are the reliable choice to help you achieve your goals with confidence.

Production Facilities

**Precision in
Production,
Excellence in
every Mix**

Batching Plants

Location and Capacities

Our factories achieve a daily production capacity exceeding 15,000 cubic meters.

Abdullah Abdin Technology and Equipment

Our factories are equipped with the latest technologies and automation systems that are considered among the most advanced globally. This investment in technology ensures efficiency, precision, and consistency in our products, resulting in superior performance.

- 250 concrete mixers of varying sizes, including 9, 10, and 12 cubic meters
- 50 ready-mix concrete pumps in different sizes
- Water coolers (Chillers) and ice plants in all the facilities

AMMANN
ELBA

Putzmeister

 **SCHWING**
Stetter

MAN

LIEBHERR

KTL

Pioneering Green Concrete Solutions in the Middle East!

Abdulla Abdin Company introduced the first electric, emission-free truck-mounted concrete pump to the Middle East:

Putzmeister's iONTRON

The iONTRON will minimize both carbon dioxide emissions and noise pollution, and electricity will be utilized instead of liquid fuel to power a concrete pump, resulting in less direct emissions.

Abdullah Abdin - Crushers

Abdullah Abdin Factory possesses five sizable crushers with impressive production capacities, generating a diverse range of aggregates in various sizes and types.

Situated at the new crusher site on Duba Road, these crushers consistently supply high-quality and clean aggregates to numerous concrete and block companies as well as factories.

The transportation of these crusher products is efficiently handled by a fleet of 50 aggregate carriers, available in sizes of 16 and 32 cubic meters.

Complementing the crushers, the operation is supported by a fleet of chippers, tippers, and bulldozers, ensuring a comprehensive and well-coordinated production process.

Abdullah Abdin - Washing of Raw Materials

To guarantee the excellence of our concrete and cement products, we have implemented a state-of-the-art automatic material batching system in our manufacturing process, boasting a daily production capacity of 200 cubic meters.

The automated washing process is facilitated by a control unit, ensuring that the materials meet the specified standards and attain the highest quality levels as per the required specifications.

4

Products and Services

**Your Reliable
Partner,
providing
High Quality
Products**

In the dynamic landscape of construction, Abdullah Abdin stands as a reliable partner, providing a diverse range of high-quality products and services....

Ready Mix Concrete

At the heart of our services is the production and supply of ready mix concrete, tailored to meet the specific needs of our clients. Our state-of-the-art batching plants ensure precise mixing, and our extensive fleet guarantees timely and efficient delivery to construction sites, contributing to project timelines and overall efficiency.

Custom Mix Designs

Recognizing the unique demands of various construction projects, we offer specialty concrete mixes engineered to meet specific performance criteria. This includes high-strength concrete, self-consolidating concrete, and fiber-reinforced concrete, among others, providing solutions for diverse construction requirements.

Concrete Pumping Services

Facilitating efficient and precise concrete placement, our company offers concrete pumping services. Utilizing modern pumping equipment, we can deliver concrete to challenging locations, contributing to increased construction speed and reduced labor requirements.

Our commitment to excellence extends beyond products to encompass comprehensive services that enhance the construction experience.

Sustainable Concrete Solutions

Embracing environmentally conscious practices, we provide sustainable concrete solutions. This includes the incorporation of supplementary cementitious materials, optimized mix designs, and environmentally friendly production processes to minimize our ecological footprint.

Quality Assurance and Testing

Our commitment to quality is underscored by rigorous testing procedures and quality assurance protocols. Regular testing of concrete properties, conducted in our state-of-the-art laboratories, guarantees that our products adhere to industry standards and exceed customer expectations.

Concrete Recycling Services

Demonstrating our commitment to sustainability, our company provides concrete recycling services. By repurposing waste concrete into aggregate materials, we contribute to the reduction of environmental impact while providing cost-effective solutions for construction projects.

Value Added Products

Our comprehensive array of products and services positions our ready mix and concrete company as a versatile and reliable partner in the construction industry.

Early Strength Concrete

The production of early and high strength concrete technology results in significant advantages:

- Faster construction time
- Lower concrete consumption (when thinner elements can be designed)
- Improved site capacity by increasing formwork rotation
- Improved service life of structure

Roller Compacted Concrete

Concrete compacted by roller compaction; concrete that in its unhardened state will support a roller while being compacted."

Speed of Construction

- Durability
- Low Maintenance
- Competitive Cost
- Sustainability

No-Fines Concrete

Concrete made without sand and therefore containing a high proportion of communicating pores which provide

- Drainage
- Thermal insulation
- Competitive Cost
- Filtration

Self Compacted Concrete

Using self-compacting concrete produce several benefits and advantages over regular concrete. Some of those benefits are:

Colored Concrete

Concrete mixed with colored cement or to which pigment has been added during mixing.

Improved constructability

Resist surface abrasion,
color will not wear away

Color extends throughout
the entire concrete slab

Chemically stable and
won't fade over time from
exposure to the weather or
ultraviolet light

Shotcrete Concrete

Shotcrete is concrete (or sometimes mortar) conveyed through a hose and pneumatically projected at high velocity onto a receiving surface. The shotcrete process is popular in many

industries pools, theme parks

skate parks

underground tunneling

retaining walls

Foamed Concrete

Foamed concrete can be produced with dry densities of 400 to 1600 kg/m³, with 7-day strengths of approximately 1 to 4 N/mm² respectively. Foam concrete is fire resistant, and its thermal and acoustical insulation properties make it ideal for a wide range of purposes, from insulating floors and roofs, benefits are:

Plaster

Plaster is a building material used for the protective and/or decorative coating of walls and ceilings and for molding and casting decorative elements. **Benefits of Plaster:**

Protective & Decorative Element

Competitive Cost

Workability up to 48H

Speed of Construction

Heavy Weight Concrete

Heavyweight concrete has been used for the prevention of seepage from radioactive structures due to the harmful effect of radioactive rays to living bodies (i.e., carcinogenic, etc.).

Improved structural Integrity

ballasting for pipelines and similar structures. EN 206:2013

Polymeric Concrete Fiber Technology

The addition of structural fibers in concrete improves the structural performance in the early ages and once hardened. The fiber controls plastic and drying shrinkage and improves the structural response to tensile, bending and shear providing a ductile failure. It also improves fatigue and impact resistance, with high impact absorption capacity as well as better fire resistance. These improvements are achieved with a polymer fiber technology of different natures, completely corrosion-free, non-magnetic, and 100% alkali resistant

Reduced costs in the casting process / or avoid costs such as pumping concrete (paving), labor cost of handling steel reinforcement

Higher accuracy in dimensioning of the reinforcement achieving a more efficient production process from a sustainable and economic point of view

The use of structural fibers is less expensive than using steel fibers. Assuming, therefore, a direct benefit

Higher flexibility in production

5

Projects Portfolio

Major Projects

As the Kingdom accelerates towards the goals of Vision 2030 led by Crown Prince Mohammed Bin Salman, Abdullah Abdin is playing a pivotal role in supporting the vision's pillars, contributing to economic diversification, job creation, and sustainable development."

نيوم NEOM

Featured Projects - The line

نيوم NEOM

In the northwest province of Tabuk, Saudi Arabia is witnessing the development of an extraordinary project – “The Line,” a futuristic megacity set to revolutionize urban planning. With an estimated value of \$500 billion, this ambitious endeavor spans an impressive 170 kilometers. Positioned as the cornerstone of Saudi Arabia’s NEOM project, “The Line” aims to propel the kingdom into a leadership role in technology, sustainability, and innovation, fundamentally altering our perception of cities and urban infrastructure.

As the pioneering concrete company, we made history by being the first to pour concrete in the groundbreaking LINE project – Saudi Arabia’s City of the future in NEOM.

Abdin ready mix company also lead the developing of the mix designs in Neom city to achieve the highest standards in technical precision and unparalleled durability - ensuring precise and efficient concrete placement especially for casting piles for the LINE project.

Featured Projects - Trojena

TROJENA, a pioneering venture in mountain tourism - aligning with Saudi Arabia's ambitious NEOM plan. A key component of the larger \$500 billion NEOM strategy, TROJENA aims to invigorate and enhance the tourism sector in the region. Anticipated for completion by 2026, this year-round tourist destination will feature a ski village, opulent family and wellness resorts, diverse retail outlets, and restaurants. Additionally, TROJENA promises a spectrum of recreational activities, including a ski slope, watersports, mountain biking, and an interactive nature reserve, positioning it as a comprehensive and enticing global destination.

In a ground-breaking partnership, Abdullah Abdin, MAN Trucks, and Liebherr mixers have created a cutting-edge transit mixer with customized specifications, especially made for the particular requirements of the hilly region of the Trojena project. With its mechanical modifications, this solution guarantees unmatched performance in handling difficult terrain and reliably and precisely distributing concrete.

Featured Projects - Amaala

AMAALA, a luxury tourism destination situated along the Red Sea coast in northwestern Saudi Arabia, spans 4,000 km², providing a year-round experience with diverse activities in sea, sun, sports, arts, and culture. The initial phase, focusing on the Triple Bay masterplan, plans to unveil eight hotels with around 1,300 rooms by 2024. By 2027, the completed AMAALA project is set to boast over 3,000 hotel rooms across 25 hotels, 943 upscale residential villas, upscale retail and dining establishments, a yacht club, and comprehensive wellness and recreational facilities, solidifying its status as a premier global destination.

Abdullah Abdin is currently working on the Triple Bay project. Triple Bay is set to provide a comprehensive wellness retreat, cutting-edge diagnostic medical facilities, and genuine treatments carefully crafted to showcase the local environment. Additionally, Triple Bay will host a fully integrated sports and entertainment community.

Featured Projects - Sindalah

Sindalah Island, a groundbreaking luxury destination within NEOM, signifies a pivotal milestone in Saudi Arabia's tourism strategy.

Spearheaded by His Royal Highness Mohammed bin Salman, it is poised to become the Red Sea's premier gateway, offering bespoke nautical experiences and creating 3,500 jobs. With an expansive area of 840,000 square meters, Sindalah embodies NEOM's commitment to sustainable development. Featuring an 86-berth marina, ultra-premium accommodations, and a world-class golf course, it promises an unparalleled experience.

Sindalah's allure lies in its state-of-the-art amenities, strategic location, and dedication to preserving the region's stunning marine environment.

As NEOM continues to redefine luxury travel, Sindalah emerges as a beacon of innovation and elegance on the international stage.

Featured Projects **OXAGON**

Oxagon, positioned in northwest Saudi Arabia, represents a groundbreaking venture as the largest floating structure globally and the inaugural fully automated port and integrated logistics hub.

Spanning an expansive 4.3 miles wide, this visionary project is designed to revolutionize advanced and sustainable industries, serving as a focal point for innovation. With an automated port seamlessly linked to a smart supply chain network, Oxagon aims to redefine industry standards. Scheduled for onshore completion by 2030, with logistics solutions facilities slated for operation by 2025, it anticipates hosting leading-edge companies at the forefront of visionary initiatives within the Kingdom.

Featured Projects NEOM Hospital

NEOM Hospital, situated in the innovative city of NEOM on the Red Sea's shores, represents a paradigm shift in modern healthcare. Boasting cutting-edge technology and a patient-centric philosophy, it exemplifies the transformative strides reshaping the medical landscape. From cardiology to neurology, NEOM Hospital offers a comprehensive suite of world-class medical services, rivaling the finest institutions globally. Its architectural design fosters healing and tranquility, providing patients with spacious, modern rooms and serene environments conducive to recovery.

Central to NEOM Hospital's excellence is its relentless pursuit of innovation. Harnessing advanced medical equipment such as AI-assisted diagnostics and robotic surgery systems, the hospital ensures precision and efficacy in treatments. Additionally, telemedicine capabilities enable remote consultations, enhancing accessibility to care. With the integration of wearable health devices and smart monitoring systems, NEOM Hospital delivers personalized care plans and fosters continuous patient engagement, setting a new standard for healthcare excellence in the region.

Completed Projects

- NEOM International Airport
- NEOM Spine Infrastructure; Running Tunnels (Mountain Section) Lot 4 & 5
- NEOM Base Economy Assets
- NEOM Construction Village Project
- NEOM site preparation for EMS & EMR; Upper Region Valley
- Tabuk Magazine Expansion
- Tabuk Operational Demo Plant – Tabuk University Greenhouse
- Tabuk Entertainment Complex - SEVEN
- Tabuk Park Mall
- King Faisal Expansion Project
- Air defense Housing Project
- Tabuk University
- 200 bed capacity Maternity and Child Hospital

Completed Projects

- 500 bed capacity King Fahad Hospital expansion
- Construction of Hotel Hala
- Construction of Ammunition inspection building for Ammunition corps
- Nissan & Toyota Showroom and workshop project
- Construction of Command centers for Ministry of defense and Aviation
- Construction of Smark Administrative building
- Tabuk regional Airport development project
- Construction of 246 villas of Residential city in Ammar
- 200 bed capacity Mental Health Hospital in Tabuk
- Tabuk Housing Project consisting 901 Villas and Mosques
- Construction of Two Holy mosques for Kin Abdullah bin Abdulaziz Project (KAP1)
- Construction of Substation 380/132/13kv BSP

The background is a light-colored wall with a power outlet and a wooden surface. The floor is made of light-colored tiles.

**Building
Excellence,
Ensuring
Quality**

QUALITY MANAGEMENT SYSTEMS

Quality Management Systems (QMS) play a pivotal role in the ready mix and concrete production industry, ensuring that our company consistently delivers high-quality products and services.

ISO CERTIFICATION AND STANDARDS

Our commitment to quality is exemplified by our adherence to International Organization for Standardization (ISO) standards. Securing certifications like ISO 9001:2015 underscores our dedication to establishing, implementing, and continually improving effective QMS.

PROCESS CONTROL AND MONITORING

Effective QMS involves stringent process control and monitoring throughout the production chain. From raw material selection and batching to mixing and delivery, our systems are designed to guarantee consistency, reliability, and conformity to specifications.

PRODUCT TESTING AND QUALITY ASSURANCE

A crucial component of our QMS is the implementation of rigorous testing procedures and quality assurance protocols. Regular testing of concrete properties ensures that our products meet or exceed industry standards, providing customers with reliable and durable construction materials.

QUALITY MANAGEMENT SYSTEMS

CUSTOMER-CENTRIC APPROACH

Our QMS places a strong emphasis on customer satisfaction. Regular feedback mechanisms, customer surveys, and swift resolution of concerns contribute to a customer-centric approach, aligning our products with the unique requirements and expectations of our clientele.

COMPLIANCE WITH REGULATORY STANDARDS

Our QMS ensures strict compliance with local and international regulations governing the ready mix and concrete production industry. Regular assessments and updates are conducted to align our practices with evolving regulatory standards.

DOCUMENTATION AND TRACEABILITY

A comprehensive documentation system is maintained to record all facets of our operations. This includes raw material certifications, production records, and quality control documentation. Detailed record-keeping ensures traceability and accountability in our processes.

Quality Policy

We are committed to produce superior quality products with applicable national and international quality standards.

We are committed to up-grade our employees at every level with continued education, training and improvement in all areas through the ISO

system to have maximum customer / Neom satisfaction level.

We follow a pre-defined Quality Assurance and Quality Control program and every employee is well aware of the quality procedures and his responsibilities.

We, always target to achieve zero defects at every level of process and quality matters that ensures the confidence of customers in us.

We are committed to operate in a manner so that there is least possible adverse effect on the environment throughout the product lifecycle, adopting the industry best practices, establishing the continual improvement program, exploring the reduce, reuse and recycling opportunities, ensuring the compliance of Environmental Management System requirements and meeting or exceeding the legal requirements in all activities, products & services.

We are committed to establish and constantly review of the identified Aspects & Impacts and Environmental Objectives to reduce air pollution, reduce & dispose of the solid wastes and minimal usage of the consumption of natural resources.

“Quality is our pride and customer’s choice”

Abdullah Abdin: Pioneering Excellence in Saudi Arabia with First-Ever Quality Certification!

Abdullah Abdin Company has achieved a significant milestone by becoming the first company in the Kingdom of Saudi Arabia to receive a prestigious quality certification, the Certificate of Conformance by NRMCA.

This notable accomplishment underscores the company's unwavering commitment to maintaining the highest standards in its products and services.

Abdullah Abdin Company's dedication to excellence and continuous improvement has not only set a benchmark within the Kingdom but also positions the company as a leader in the industry. This recognition not only reflects the company's commitment to quality but also instills confidence in its stakeholders, clients, and the broader business community.

“Abdullah Abdin Company's pioneering achievement in securing the Certificate of Conformance is a testament to its pursuit of excellence and its role as an industry pioneer in Saudi Arabia.”

8

Health, Safety and Environment

A full-page photograph of a construction worker standing in the foreground, wearing a white hard hat, safety glasses, a beard, and a high-visibility vest over a light-colored long-sleeved shirt and pants. The vest is yellow with reflective silver and blue horizontal stripes. In the background, a red and white concrete mixer truck is parked on a construction site. The scene is illuminated by warm, golden light, likely from the setting or rising sun, creating a lens flare effect. On the left side, there is a red rectangular overlay containing white text.

Prioritizing Safety, Health & Environment

Health and Safety at Abdullah Abdin

Ensuring the well-being of our employees is a top priority at Abdullah Abdin Company. We recognize that a safe and healthy working environment is essential for the success and sustainability of our operations.

Our health and safety procedures are implemented to protect our workforce, visitors, and the communities in which we operate.

Health and Safety Policy

Abdullah El Abdin Company is committed to maintaining the highest standards of health and safety in all aspects of our business. Our Health and Safety Policy serves as a guiding document that outlines our commitment to:

- Providing a safe and healthy working environment.
- Complying with all relevant health and safety legislation and regulations.
- Continuously improving our health and safety performance through regular assessments and reviews.
- Promoting a culture of responsibility and accountability at all levels of the organization.

Environmental Stewardship

In an era where environmental consciousness is paramount, our ready mix and concrete company proudly embraces a commitment to sustainable practices. The following outlines our initiatives and measures we have implemented to minimize our ecological footprint.

1. Pollution Mitigation through Advanced Filtration

To safeguard the environment from industrial pollution, our company has invested in cutting-edge filtration systems within our manufacturing facilities. These state-of-the-art filters effectively capture and reduce emissions, ensuring that the cement produced and stored in our warehouses adheres to the highest environmental standards.

2. Rigorous Material Examination with Al-Amana Laboratory

Recognizing the significance of concrete mixtures in construction projects, we have partnered with the esteemed Al-Amana laboratory. Their expertise allows us to meticulously examine and approve the raw materials integral to our concrete mixtures, guaranteeing the quality and sustainability of our products.

3. Periodic Calibration and Certification

Calibration isn't a one-time endeavor; it's a continuous process that ensures ongoing accuracy. Our company adheres to a rigorous schedule of periodic calibrations, reevaluating and certifying the accuracy of our central mixing units every four months. This proactive measure not only meets industry standards but also reinforces our commitment to delivering consistent and reliable concrete products.

4. Calibration Excellence with Tabuk Municipality Laboratory

Our commitment to precision extends to the calibration of the scales in our central mixing units. Through a collaborative effort with the Tabuk Municipality Laboratory, we ensure that the weighing systems in our facilities are accurate and reliable. Regular calibrations, conducted every four months, are integral to maintaining the precision of our operations. Calibration certificates are issued for all central mixing units, attesting to our dedication to quality assurance.

5. Central Workshop for Heavy Equipment Maintenance

At the heart of our environmental responsibility lies our central workshop, dedicated to the maintenance of heavy equipment. Regular inspections, servicing, and preventive maintenance not only extend the lifespan of our machinery but also contribute to the reduction of waste. By prioritizing the longevity and efficiency of our equipment, we minimize the environmental impact associated with frequent replacements and repairs.

As a responsible player in the ready mix and concrete industry, our company stands firm in its commitment to environmental stewardship. Through advanced filtration, meticulous material examination, precise calibration, and dedicated equipment maintenance, we strive to lead by example, showcasing that sustainable practices are not only achievable but essential in shaping a greener and more responsible future for our industry.

Environmental Product Declaration

Abdulah Abdin's acquisition of an Environmental Product Declaration (EPD) marks a significant step towards ensuring environmentally responsible practices in his business endeavors.

The Life Cycle Assessment Studies (LCA) employed by Abdin serve as a valuable decision-support tool, offering insights into the environmental impact of various stages in a product's life cycle. By utilizing LCA, Abdin can make informed choices in the design, manufacturing, and utilization of products or systems.

Companies adopting LCA often discover avenues for product improvement, innovative process optimization strategies, and even entirely new solutions to meet consumer needs.

Furthermore, the EPDs generated from LCA enable producers to assess their supply chain, leading to the development of action plans that enhance the demand for eco-friendly products and services.

Abdulah Abdin's commitment to incorporating EPDs showcases a dedication to fostering environmental responsibility and sustainable business practices.

9

Sustainability

Solid Foundations, Sustainable Solutions

Embracing Sustainability in our Operations

Sustainability has become a pivotal consideration, and our company recognizes the imperative to integrate environmentally responsible practices into our operations.

Eco-Friendly Concrete Mix Designs

At the core of our sustainability efforts is the development and implementation of eco-friendly concrete mix designs. We collaborate with materials engineers and specialists to optimize the use of supplementary cementitious materials (SCMs) and recycled aggregates. This not only reduces our reliance on traditional raw materials but also diminishes the environmental impact associated with their extraction and transportation.

Water Conservation and Responsible Usage

Water is a precious resource, and our company is dedicated to its responsible usage and conservation. Through the implementation of water-efficient technologies, such as advanced mixing and curing methods, we strive to minimize water consumption without compromising the quality and integrity of our concrete products.

Recycling and Reusing Concrete Waste

Our commitment to sustainability extends beyond the production phase to the responsible management of waste. We actively promote the recycling and reuse of concrete waste generated during demolition or production failures. Through crushing and processing, we transform discarded concrete into recycled aggregates, closing the loop and contributing to the circular economy.

Green Logistics and Supply Chain Management

Efficient logistics and supply chain management play a crucial role in reducing the environmental impact of our operations. We prioritize local sourcing of raw materials to minimize transportation distances, thereby lowering carbon emissions. Additionally, we collaborate with suppliers who share our commitment to sustainability, ensuring that the entire supply chain aligns with eco-friendly principles.

Carbon Footprint Reduction through Efficient Production

Recognizing the significant carbon footprint associated with concrete production, we have embraced innovative technologies and practices to enhance the efficiency of our manufacturing processes. This includes the utilization of energy-efficient equipment, incorporation of alternative fuels, and optimization of production schedules to reduce energy consumption and minimize emissions.

Abdullah Abdin has incorporated Carbon Cure into its sustainability initiatives to enhance the strength of concrete businesses and address the growing need for eco-friendly concrete.

CarbonCure's technology introduces recycled CO₂ into fresh concrete, reducing its carbon footprint without affecting performance. The injected CO₂ undergoes mineralization and becomes permanently integrated into the concrete, offering economic and climate advantages for producers in a mutually beneficial arrangement.

Abdullah Abdin's company has achieved the CSC Bronze Certification, becoming the first ready-mix company in the region to obtain this prestigious recognition. This certification, awarded by the Concrete Sustainability Council (CSC), recognizes the company's efforts in ensuring environmentally friendly production, ethical sourcing, and social responsibility within the cement and ready-mix industry. By obtaining CSC Bronze, Abdullah Abdin reinforces its dedication to sustainable development, aligning with global standards while contributing to greener and more responsible construction in the region.
